

About Mozu Applications

Mozu provides a modern commerce platform with a robust out-of-the-box feature set and an easy-to-extend architecture. Mozu extensibility is made possible through “Applications.” Applications offer a simplified way to expand the native capabilities of the Mozu platform and easily integrate with 3rd party technologies, such as eBridge Connections.

The eBridge Connections for Mozu Application

eBridge Connections is a leading provider of ERP and accounting integration solutions, offering a cloud-based platform for Mozu-powered businesses to automate vital business processes and eliminate manual data entry. With the eBridge Connections Application for Mozu, businesses can now connect and integrate data with over 20 ERP and accounting systems, including products from Microsoft, Sage, NetSuite, SAP, Epicor and Intuit QuickBooks. With this application, users will have the ability to automate the exchange of order and inventory data, bi-directionally, between their Mozu storefront and back office. Resulting from this automated integration is an increase in the accuracy and speed of data exchange and greater operational efficiencies.

eBridge Connections for Mozu Application Set-up

Setting up the eBridge Connections Application for Mozu is made simple with a streamlined user interface for configuration. With just a few quick clicks, you can have the application up and running in a matter of minutes.

Connect with any ERP or Accounting Package

Following the installation of the eBridge Connections Application, Mozu merchants will be provided with the option to integrate their storefront with any of over 20 different accounting and ERP packages. eBridge Connections can facilitate Mozu integration with popular ERP and accounting packages such as Microsoft Dynamics AX, GP, NAV & SL, Sage 100, 300 & 500, NetSuite, SAP Business One, Epicor Enterprise and many others.

Streamline Item, Order and Customer Data Processing

With an end-to-end integration solution in place, Mozu merchants will be able to eliminate their labour-intensive data entry processes and reduce costly mistakes. The eBridge Connections integration platform powers automated, bi-directional data exchange over numerous touch points including:

- Orders
- Customer information
- Inventory
- Shipment tracking
- Product information
